Intellectual Property Litigation

Our Intellectual Property Litigation Practice is a dedicated team of attorneys who handle all aspects of intellectual property disputes including patent, trademark and copyright infringements, as well as trade secret, unfair competition and inventor disputes.

We recognize that intellectual property (IP) can be a company's most valued asset. We also understand that with the increasing costs associated with IP litigation, clients need skilled attorneys who can help them efficiently and effectively navigate the complex cases that face them. Our attorneys have years of experience and routinely represent plaintiffs and defendants in protection, enforcement and defense actions related to IP rights in both trial and appellate courts throughout the United States. Our goal is to achieve our clients business objectives by negotiating a beneficial resolution and, when necessary, aggressively representing them at trial.

Our attorneys have litigation experience in a wide range of technologies ranging from pumps and valve assemblies to power generation equipment to telecommunication devices to medical devices. Our Intellectual Property Practice attorneys have engineering and related science degrees. Most of our IP Litigation Practice attorneys are registered to practice before the United States Patent and Trademark Office.

In addition to our dedicated IP Litigation Practice, we offer clients a full range of legal services including electronic discovery (eDiscovery) and records management. By providing a full range of services to our clients, we can better manage the costs associated with each litigation.

For questions or more information, please contact Jon M. Gibbs, Chair of the firm's Intellectual Property Services Group.
